R9BT

The R9 BT: an active loudspeaker with a Bluetooth function, or a speakerphone that can float?
Both, of course.
The R9 BT is the ideal travel companion that allows you to make a wireless connection to your smartphone. Just imagine, you can enjoy the warm sounds of your favourite music, or answer your phone handsfree. The high-tech features of the R9 BT are built into an unusually sturdy design. This design makes it shock-resistant - or should we say wave-resistant?

No electrical outlets available poolside? No problem - the waterproof speaker is battery-operated, so it can give you 10 hours of listening pleasure. Even in the water.

COLOURS black/orange
