SOUND OF SCANDINAVIA

*All your music wirelessly*

Play what you want from wherever you want. It doesn't matter if you're using iOS®, Android®, Windows Phone® or Mac / PC. The Addon T speakers takes care of the sound from any device with Bluetooth®.

## *Massive sound pressure*

Audio Pro's specialty since 1978 is big sound from small speakers. Our engineers have optimized the acoustic design to render stunning dynamics, deep bass and sound pressure in abundance. By using a system with optimized speaker drivers, driven by digital amplifiers mastered by advanced DSP processing, Addon T Series speakers delivers a natural, clean and roomfilling dimension to your music from any format and sound source.

## *Sophisticated simplicity*

Addon T Series speakers are consciously designed to blend in, rather than dominate, a home decor. With pure design and matt lacquered in white or black, they will enhance the experience in any home with a natural uncomplicated form, hifi sound quality and easy operations. And getting rid of all those cables does wonders for the interior.

All operations are easily handled with the solid remote control, milled out of a single piece of aluminum.

Remote made from a single piece of aluminum. Solid feeling that sits perfectly in your hand.

 **Bluetooth® 4.0**

Addon T speakers uses the latest Bluetooth® 4.0 standard for best possible wireless hifi transmission.

Addon T-speakers have aptX® codec from CSR, which was developed to provide the kind of crystal-clear sound that Audio Pro customers are accustomed to.

## Multi talents

Besides listening to music wirelessly in hifi quality via Bluetooth, you can connect multiple sound sources to Addon T8 and T10. With dual audio inputs (3.5mm stereo & RCA) any device with audio output can be connected.

If even more bass pressure is required, a powered subwoofer can easily be connected both Addon T8 and T10. Addon Sub fits perfectly, but any powered subwoofer can be connected.

*Addon T8: USB power supply only for Audio Pro Wireless HiFi receivers.*

*Addon T10: USB port charges most smartphones/tablets, and can also be used to connect Audio Pro Wireless HiFi receivers.*

## Digital audio

Addon T12 has, in addition to an analog audio input, also an optical digital TOSLink input.

Easily connect an Apple TV to take advantage of the intuitive Apple Airplay® streaming functionality. Or connect to your TV's optical audio output for vastly improved TV and movie sound.

*Addon T12: USB port charges most smartphones/tablets, and can also be used to connect Audio Pro Wireless HiFi receivers.*

Addon Sub is designed to add that physical dimension to your music. Unintrusive design that blends into any environment.

## *Powerful deep bass out of the ordinary*

Addon Sub adds heavy and firm bass to all music and movies. The physical experience of feeling sound with your body, not just hearing, gives an added dimension to your listening experience. This is one hard-working subwoofer that whether you are watching movies or listening to music gives you that extra dimension. A down firing long-throw 8" woofer and 150W Class D amplifier with DSP that together deliver a bass experience out of the ordinary.

Although Addon Sub fits perfectly to our Addon speakers, it can be connected to any device that has a sub output. Connect to powered speakers, stereo or home theater receivers. You can customize the bass sound to work perfectly in your room, making Addon Sub easy to place in any environment.
